What is this product?

Type: Shares of a Sub-Fund of LYXOR, a SICAV.

Term: The term of the Sub-Fund is unlimited. The Management Company may terminate the fund by liquidation or merger with another fund in accordance with legal requirements.

Objectives: The Sub-Fund is a passively managed, index-tracking UCITS.

The Sub-Fund tracks the MSCI Total Return Net World Index (Bloomberg ticker: NDDUWI) (the Sub-Fund's "Index") as the benchmark index and its investment objective is to provide shareholders with a return that is tied to the performance of the Sub-Fund's "Index". The Index is weighted on the basis of market capitalisation and reflects the performance of the stock markets in the world's industrial nations. In addition to the market values of the companies contained in the Index, dividend payments – less withholding tax – are taken into account in the Index calculation. Information on the Index is available at www.msci.com.

The Sub-Fund seeks to attain the investment objective via indirect replication, in that it will acquire transferable securities and will also employ derivative techniques to compensate for any difference in performance between those securities acquired by the Sub-Fund and the Index to be tracked. For example, the SubFund will enter into a swap agreement with one or more counterparties, which firstly neutralise the performance of the Securities Basket through the swap in exchange for an agreed money market rate and secondly link the Sub-Fund's assets to the performance of the Index in exchange for payment of an agreed money market rate. Alternatively, however, corresponding forward contracts or total return swaps may also be entered into, with the same economic objective of aligning the performance of the Sub-Fund's assets with that of the Index. The total exposure of the Sub-Fund to total return swaps is not expected to exceed 100% of the net asset value. This threshold may be exceeded in certain circumstances. In order to maintain exposure, the positions in futures contracts need to be "rolled over": the rolling over of futures contracts involves transferring futures contracts that are close to becoming

due (and in all cases before they fall due) into futures contracts with a longer maturity. Shareholders are subject to a risk of losses due to the process of rolling over the futures contracts. Securities lending transactions may be concluded for the SubFund.

The indicative net asset value is published on the website www.boerse-frankfurt.de/etf as well as on the websites of other financial data providers (e.g. Bloomberg, Reuters, Telekurs). The indicative net asset value may also be published on other websites. The Sub-Fund's units may be redeemed at their net asset value (NAV) on any bank business day or traded at their current market price on an exchange or over the counter. The Management Company may suspend redemption if exceptional circumstances make this necessary when taking investors' interests into account.

The base currency of the Sub-Fund is USD.

The Sub-Fund is a distributing fund, i.e. any dividends and other income can be distributed.

Intended Retail Investor: This product is intended for investors, with a basic knowledge of and no or limited experience of investing in funds and who are prepared to take on a high level of risk to their original capital.

Redemption and Dealing: Shares may be sold (redeemed) as stated in the prospectus at the respective dealing price (net asset value). Further details are provided in the LYXOR prospectus.

The Fund's amounts available for distribution (if any) will be distributed.

More Information: You may get further information about the Sub-Fund, including the prospectus, and financial reports which are available at and free of charge on request from: Amundi Luxembourg S.A. at 5, allée Scheffer 2520 Luxembourg, Luxembourg.

The Net Asset Value of the Sub-Fund is available on www.amundi.lu.

Depository: BNP PARIBAS LUXEMBOURG.

What are the risks and what could I get in return?

RISK INDICATOR

Lower Risk

Higher Risk

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

PERFORMANCE SCENARIOS

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Sub-Fund over the last 5 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

What you get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Additional risks: Market liquidity risk could amplify the variation of product performances.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the LYXOR prospectus.

The figures shown include all the costs of the product itself, but may or may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

This type of scenario occurred for an investment using a suitable proxy.

What happens if Amundi Luxembourg S.A. is unable to pay out?

A separate pool of assets is invested and maintained for each Sub-Fund of LYXOR. The assets and liabilities of the Sub-Fund are segregated from those of other sub-funds as well as from those of the Management

Company, and there is no cross-liability among any of them. The Sub-Fund would not be liable if the Management Company or any delegated service provider were to fail or default.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- USD 10,000 is invested.
