Information to the Shareholders

The Annual General Meeting of the Shareholders of the Company is held at the Registered Office of the Company or at such other place in Luxembourg as indicated in the convening notice on the last Monday of February of each year at 2 p.m. Luxembourg time. If any such day is not a business day, the Annual General Meeting shall be held on the next following full business day.

To the extent required by Luxembourg law, notices of all General Meetings will be published in the *Recueil Electronique des Sociétés et Associations* on the RCS website of Luxembourg (the "RESA"), in a Luxembourg newspaper and in any other newspapers that the Board of Directors of the Company may determine and will be sent by mail to the registered Shareholders, at least 8 days before the date of the General Meeting.

The financial year ("Financial Year") of the Company starts on the first day of November in each year and ends on the last day of October of the next year.

The annual reports including audited financial statements are published within 4 months after the end of the Financial Year and the unaudited semi-annual reports are published within 2 months at the end of the relevant period. The reports include separate information on each of the Sub-Funds as well as combined information on all Sub-Funds. The reports are available at the Registered Office of the Company during normal business hours.

A detailed schedule of portfolio changes during the year is available free of charge upon request at the registered office of the Company.

The Company has been established for an undetermined period.

Report of the Board of Directors of the Company

LYXOR CORE STOXX EUROPE 600 (DR)

The investment objective of the sub-fund is to track the performance of STOXX EUROPE 600 (NET RETURN) EUR (Ticker:SXXXR).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor Core STOXX Europe 600 (DR) - SE	LU0317841665	EUR	-5.71%(1)	-5.93%		73.93%
Lyxor Core STOXX Europe 600 (DR) - SE-W	LU0726478745	EUR	-5.68%(1)	-5.93%		71.42%
Lyxor Core STOXX Europe 600 (DR) - UCITS ETF Acc	LU0908500753	EUR	-5.70%(1)	-5.93%		42.65%
Lyxor Core STOXX Europe 600 (DR) - UCITS ETF Monthly Hedged to EUR - Dist	LU1574142243	EUR	-5.78%(1)	-5.84%(2)		1.23%

(1)«The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index;
- sampling techniques or efficient portfolio management techniques»

(2)«The relevant benchmark for comparison is the hedged Index.»

The Tracking Error is 0.0807% for the sub-fund. The Tracking Error target for the year was 0.2%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Report of the Board of Directors of the Company (continued)

Lyxor Smart Cash

The investment objective of the sub-fund Lyxor Index Fund – Lyxor Smart Cash is to generate a return linked to money market rates.

The sub-fund Lyxor Index Fund – Lyxor Smart Cash is actively managed within a strict risk and liquidity control environment.

The index used as benchmark is the EONIA (Euro OverNight Index Average) compounded rate.

The reference benchmark for investments in share-classes not denominated in Euro is the equivalent overnight money market rate for the currency of the related share class.

The net asset value of the share IE of the sub-fund Lyxor Index Fund - Lyxor Smart Cash has evolved from -0.33% over the year and established at 992.9079 EUR as of 31/10/2018, which is a performance of -0.71% since inception. The relevant benchmark is EONIA compounded rate. This index had a performance in EUR of -0.36% over the period.

The net asset value of the share IG of the sub-fund Lyxor Index Fund - Lyxor Smart Cash has evolved from 0.66% over the year and established at 1 020.6221 GBP as of 31/10/2018, which is a performance of 2.06% since inception. The relevant benchmark is SONIA compounded rate. This index had a performance in GBP of 0.53% over the period.

The net asset value of the share IU of the sub-fund Lyxor Index Fund - Lyxor Smart Cash has evolved from 2.00% over the year and established at 1 041.2878 USD as of 31/10/2018, which is a performance of 4.13% since inception. The relevant benchmark is Federal Funds compounded rate. This index had a performance in USD of 1.70% over the period.

The net asset value of the share UCITS ETF C-EUR of the sub-fund Lyxor Index Fund - Lyxor Smart Cash has evolved from -0.33% over the year and established at 992.9079 EUR as of 31/10/2018, which is a performance of -0.71% since inception. The relevant benchmark is EONIA compounded rate. This index had a performance in EUR of -0.36% over the period.

The net asset value of the share UCITS ETF C-GBP of the sub-fund Lyxor Index Fund - Lyxor Smart Cash has evolved from 0.66% over the year and established at 1 020.6221 GBP as of 31/10/2018, which is a performance of 2.06% since inception. The relevant benchmark is SONIA compounded rate. This index had a performance in GBP of 0.53% over the period.

The net asset value of the share UCITS ETF C-USD of the sub-fund Lyxor Index Fund - Lyxor Smart Cash has evolved from 2.00% over the year and established at 1 041.2878 USD as of 31/10/2018, which is a performance of 4.13% since inception. The relevant benchmark is Federal Funds compounded rate. This index had a performance in USD of 1.70% over the period.

Investment techniques over the period

In order to meet the investment objective, the sub-fund Lyxor Index Fund – Lyxor Smart Cash has entered in a Total Return Swap (TRS) and into efficient portfolio management techniques (securities lending), both with Société Générale.

In connection with the TRS, both parties, on a daily basis, adjust swap parameters in order to reset the market value, offsetting counterparty risk. The change in the composition of the assets of the basket must respect specific rules, agreed by both parties.

For the avoidance of doubt, the sub-fund Lyxor Index Fund – Lyxor Smart Cash did not invest in money market papers over the period.

Report of the Board of Directors of the Company (continued)

Lyxor Alpha Plus Fund

The net asset value of the Lyxor Alpha Plus fund decreased by -2.88% (to 100.1669 EUR) over the past fiscal year. During this period, the benchmark Euribor 3M index declined by -0.32%, while the HFRXGLE Global Hedge Fund EUR index lost -6.72%.

The period was marked by two significant market corrections (February and October) in a context of rising geopolitical and economic uncertainties: notably the trade tensions between US and China, the progressive Fed tightening, a monetary crisis in Turkey, as well as tensions in Europe about Italy's deficit budget, and Brexit negotiations.

The best performing strategies in this environment were linked to "Arbitrage", namely Merger Arbitrage (+0.10%) and Credit Arbitrage (-0.07%). The funds that had the greatest positive contributions were Eleva Absolute Return (+0.18%), Lyxor Tiedemann Arbitrage Strategy (+0.10%) and Schroder GAIA Two Sigma (+0.05%). In opposite to last year, Legg Mason Western Asset Macro Opportunities was the worst contributor.

During the period, 3 funds were added to the portfolio (Eleva Absolute Return, Lyxor Sandler US Equity and BlackRock Americas Diversified Equity Absolute Return) while 3 funds were removed (Schroder GAIA Two Sigma, Lyxor Capricorn and BlackRock European Diversified Equity Absolute Return). The allocation now consists of 15 names.

Crystal Europe Equity

The portfolio is flat -0.05% since the October 31st, 2017. Over the same period the hedge fund industry represented by the HFRXGLE Index (in Euro) was down -6.72%

The period was marked by two significant market corrections (February and October) in a context of geopolitical and economic uncertainties: notably the trade tensions between US and China, the end of accommodation and progressive Fed tightening, the monetary crisis in Turkey, as well as tensions in Europe about Italy's deficit budget, and Brexit negotiations.

In this context risky assets posted negative returns in Europe, with European stocks falling by -5.76% for the MSCI Europe Net Total Return.

During the period, alpha came mainly from the long book, in particular during the second semester.

Going forward, the fund is well positioned to benefit from the recovery of European equities. While October was difficult for the short book, we expect some improvements.

Index Linked Swap's counterparty is : Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Report of the Board of Directors of the Company (continued)

Lyxor Italia Bond PIR (DR) UCITS ETF

The investment objective of Lyxor Italia Bond PIR (DR) UCITS ETF (the “Sub-Fund”) is to reflect the Reference Strategy (as defined below) described in the Investment Strategy section and designed by the Management Company, offering an exposure to Italian and non-Italian Euro-denominated bonds issued by companies and governments, both from Members States of the European Union or countries participating in the European Economic Area (EEA), while neutralizing the impact of interest rates movements on the value of the portfolio within the limits set by the PIR Legislation.

The Reference Strategy is designed as described below.

It is broken down into three sub-portfolios:

- a sub-portfolio of Italian, French and Spanish government bonds (hereafter the “A Sub-Portfolio”).

The objective of the Management Company is that on a Rebalancing Date (as defined thereafter), the market value of the A Sub-Portfolio has a target value of 25% of the Reference Strategy; on a Rebalancing Date, the market value exposure of a single country will be equal to one third of the market value of Sub-Portfolio A.

- a sub-portfolio of all Euro-denominated bonds (hereafter the “B Sub-Portfolio”) issued by:
 - either an Italian company, member of the large caps index indicated in the PIR Legislation (or any subsequent index); or
 - a foreign company, resident in an EU member State or in a EEA participating country which has a permanent establishment in Italy, and which is a member of an equivalent large caps index of another regulated market.

and satisfying additional selection criteria (such as, but not limited to, the type of the bonds, their maturity and amount outstanding) systematically applied on all available bonds in order to increase the liquidity of Sub-Portfolio B.

Each bond in Sub-Portfolio B will be market value-weighted with respect to the total market value of Sub-Portfolio B. The objective of the Management Company is that on a Rebalancing Date, the market value of the B Sub-Portfolio has a target value of 50% of the Reference Strategy.

- a sub-portfolio of all Euro-denominated bonds (hereafter the “C Sub-Portfolio”) issued by:
 - either an Italian company, which is not a member of the large caps index indicated in the PIR Legislation (or any subsequent index); or
 - a foreign company, resident in an EU Member State or a country participating in the EEA which has a permanent establishment in Italy and which is not a member of an equivalent large caps index of another regulated market.

and satisfying additional selection criteria (such as, but not limited to, the type of the bonds, their maturity and amount outstanding) systematically applied on all available bonds in order to increase the liquidity of Sub-Portfolio C.

Each bond in Sub-Portfolio C will be market value-weighted with respect to the total market value of Sub-Portfolio C. The objective of the Management Company is that on a Rebalancing Date, the market value of the C Sub-Portfolio has a target value of 25% of the Reference Strategy.

In order to neutralize the impact of interest rates movements on the the value of the portfolio and in accordance with the PIR Legislation, the Sub-Fund will use financial derivatives instruments (“FDI”) which may be listed.

FDI include but not limited to, futures contracts, swaps (including equity swaps and hedging swaps), contracts for difference, forward contracts within the limits set forth under the Sub-Fund investment general restrictions and for reasons such as aiming to neutralize the sensitivity of the Reference Strategy to interest rates movements, in accordance with the Investment Objective of the Sub-Fund.

The Sub-Fund’s portfolio will be rebalanced monthly on the last business day of the month (the “Rebalancing Date”).

Report of the Board of Directors of the Company (continued)

Performances over the period:

Share Name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign Exchange	
Lyxor Italia Bond PIR (DR) UCITS ETF - Acc	LU1745467461	EUR	-2.89%(1)			-2.89%

The yearly performance of the fund is due to the rise of both interest rates and credit spread of corporate bonds during the period. Indeed the Italian interest rates market has been affected by the significant rise of the risk of Italian Debt as perceived by investors after Italian general elections. The performance has also been affected by the management and the administrative fees, the index replication costs, and the sampling techniques.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Report of the Board of Directors of the Company (continued)

LYXOR ROBOTICS & AI UCITS ETF

The investment objective of the sub-fund is to track the performance of Rise of the Robots NTR Index USD (Ticker:SGIXROBO).

Performances over the period:

(2)«The relevant benchmark for comparison is the hedged Index.»

The Tracking Error is 0.0016% for the sub-fund. The Tracking Error target for the year was 0.02%.

The tracking error has remained below the anticipated tracking error due to market conditions and replication techniques implemented by the management teams.

With regards to Tracking error computation, performance until 25/10/2018 corresponds to performance of LYXOR IBOXX \$ LIQUID EMERGING MARKETS SOVEREIGNS UCITS ETF . This fund was absorbed by the fund on 25/10/2018.

Index Linked Swap's counterparty is : Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

The sub-fund is the result of a merger/absorption. The performances mentioned in the report are calculated from the inception date of the absorbed fund.

REPORT OF THE *RÉVISEUR D'ENTREPRISES AGRÉÉ*

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Lyxor Index Fund (the “Company”) and of each of its sub-funds, which comprise the statement of net assets and the schedule of investments as at October 31, 2018, and the statement of operations and changes in net assets for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company and of each of its sub-funds as at October 31, 2018, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the EU Regulation N° 537/2014, the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the *Commission de Surveillance du Secteur Financier* (CSSF). Our responsibilities under the EU Regulation No 537/2014, the Law of 23 July 2016 and ISAs are further described in the “Responsibilities of the *Réviseur d'Entreprises Agréé* for the Audit of the financial statements” section of our report. We are also independent of the Company in accordance with the International Ethics Standards Board for Accountants’ Code of Ethics for Professional Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of the audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Existence and valuation of Index-linked SWAPS

Why the matter was considered to be one of most significance in the audit ?	How the matter was addressed in the audit ?
<p>Twenty Sub-Funds of Lyxor Index Fund are investing in index-linked swaps. These swaps are OTC (“Over-the-counter”) derivative instruments. We refer to Note 10 to the financial statements for the description of instruments held.</p> <p>The commitment on these investments is significant to the Sub-Funds’ investment activity. Some of those OTC derivative instruments are neither directly held by the Depositary nor kept by credit institutions but are contracts between the parties. This requires specific procedures by the Depositary on the statements received from OTC derivative instruments’ counterparties to ensure their existence and the correct manual accounting input after each transaction.</p> <p>We refer to Note 2.8. related to the valuation of swaps.</p> <p>Index-linked swaps are valued on basis of directly observable market data.</p>	<p>Our audit procedures over the existence and valuation of the Company’s OTC derivative instruments consisted in:</p> <ul style="list-style-type: none"> • obtaining an understanding of the Administrative Agent’s and the Depositary’s internal controls, including controls in place around the transaction processing of OTC derivatives, the reconciliation of holdings between fund accounting and broker and/or counterparty statements of holdings at valuation date and valuation of different kinds of OTC derivative instruments held; • requesting from the Depositary a confirmation of all assets including derivatives held directly as well as of all other assets held outside the Depositary network; • inspecting reconciliations performed by the Depositary at year-end between their records and the statements of OTC derivatives held obtained from counterparties; • reading the prospectus to understand how the Company describes to shareholders its valuation policy for OTC derivative instruments, and assessing that the described valuation method is commonly used by market players and adequate for each type of OTC derivative instruments; • performing substantive procedures to analyse the correlation of the performance of the index of specific index-linked swaps with the performance of the net asset value per share of the related sub-fund for a sample of sub-funds; • using our own valuation specialists where necessary to assist us in valuing a sample of swaps. Our internal specialists validated all key external inputs used in calculations to third party data source. They re-performed at year-end an independent valuation of a sample of instruments held. We compared this independent valuation to the valuation disclosed in the financial statements at year-end.

Other information

The Board of Directors of the Company is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the *Réviseur d'Entreprises Agréé* thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the Financial Statements

The Board of Directors of the Company is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as Board of Directors of the Company determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Company is responsible for assessing the Company's and each of its sub-funds ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Company either intends to liquidate the Company or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the *Réviseur d'Entreprises Agréé* for the Audit of the Financial Statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the *Réviseur d'Entreprises Agréé* that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the EU Regulation N°537/2014, the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the EU Regulation N° 537/2014, the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control;
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Company;
- Conclude on the appropriateness of the Board of Directors of the Company's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the *Réviseur d'Entreprises Agréé* to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the *Réviseur d'Entreprises Agréé*. However, future events or conditions may cause the Company to cease to continue as a going concern;
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our report unless law or regulation precludes public disclosure about the matter.

Report on Other Legal and Regulatory Requirements

We have been appointed as *Réviseur d'Entreprises Agréé* by the General Meeting of the Shareholders on February 28, 2018, and the duration of our uninterrupted engagement, including previous renewals and reappointments, is one year.

We confirm that the prohibited non-audit services referred to in the EU Regulation N° 537/2014 were not provided and that we remained independent of the Company in conducting the audit.

For Deloitte Audit, *Cabinet de révision agréé*

Elisabeth Layer, *Réviseur d'entreprises agréé*
Partner

Notes to the financial statements

1 - General

Lyxor Index Fund (the “Company”) is an Investment Company with Variable Capital (SICAV) incorporated under Luxembourg Law on June 16, 2006 and listed on the official list of Undertakings for Collective Investment in Transferable Securities. The Company is governed by the provisions of Part I of the amended Luxembourg law of December 17, 2010 relating to Undertakings for Collective Investment in Transferable Securities.

The Articles of Incorporation were published in *Mémorial C, Recueil Spécial des Sociétés et Associations* (the “Mémorial”) on July 13, 2006.

The Articles of Incorporation, as amended on February 7, 2007, on September 8, 2009, on April 17, 2012, and on January 28, 2014 are deposited and available for inspection at the *Registre de commerce et des sociétés* of Luxembourg.

A novation to the Main Delegation Agreement dated April 9, 2014 was signed between Lyxor Index Fund, and Lyxor International Asset Management S.A.S. and appointed Lyxor International Asset Management S.A.S as Management Company of the Company

The Company is registered with the Luxembourg Trade Register under number B 117.500.

As at October 31, 2018, 33 Sub-Funds are available:

- Multi Units France - Lyxor iBoxx \$ Liquid Emerging Markets Sovereigns UCITS ETF into Lyxor Index Fund - Lyxor iBoxx \$ Liquid Emerging Markets Sovereigns UCITS ETF on October 25, 2018.

2 - Significant accounting policies

2.1 Presentation of financial statements

The financial statements of the Company are presented in accordance with Luxembourg laws and regulations relating to Undertakings for Collective Investment in Transferable Securities. They are prepared in accordance with generally accepted accounting principles in Luxembourg.

2.2 Valuation of assets

The basic accounting principles for determining the Net Asset Value of the Sub-Funds are set forth in the Articles of Incorporation.

The material provisions are as follows:

2.2.1 The value of any cash on hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued and not yet received shall be deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof shall be arrived at after making such discount as the Board of Directors of the Company may consider appropriate in such case to reflect the true value thereof.

2.2.2 Securities listed on a recognised stock exchange or dealt on any other Regulated Market that operates regularly, is recognised and is open to the public are valued at their last available closing prices or in the event that there should be several such markets on the basis of the main market for the relevant security. For the financial statements as at October 31, 2018, such securities are valued with the closing prices of October 31, 2018 for all Sub-Funds except for Lyxor Smart Cash. In accordance with its valuation policy, the securities held by the sub-fund Lyxor Smart Cash were valued based on the latest available closing prices as at October 31, 2018 (i.e. closing prices as at October 30, 2018). Had the securities been valued on the basis of the closing prices as at October 31, 2018, the total net assets of Lyxor Smart Cash would have been EUR 1,044,814,913 (against 1,025,265,078 as disclosed in this report i.e. +1.91%).

2.2.3 In the event that the last available closing price does not, in the opinion of the Board of Directors of the Company, truly reflect the fair market value of the relevant securities, the value of such securities is defined by the Board of Directors of the Company based on the reasonably foreseeable sales proceeds determined prudently and in good faith by them.

Notes to the financial statements (continued)

2.2.4 Securities not listed or traded on a stock exchange or not dealt on another Regulated Market are valued on the basis of the probable sales proceeds determined prudently and in good faith by the Board of Directors of the Company.

2.2.5 Money market instruments not listed or traded on a stock exchange or not dealt with on another Regulated Market are valued at market value determined by the Board of Directors of the Company plus any accrued interest or an amortised cost basis.

2.2.6 Investments in open-ended UCI are valued on the basis of the last available prices of the units or shares of such UCI.

2.2.7 All other transferable securities and other permitted assets are valued at fair market value as determined in good faith pursuant to procedures established by the Board of Directors of the Company.

2.2.8 The liquidating value of futures, forward or options contracts not traded on exchanges or on other Regulated Markets shall mean their net liquidating value determined, pursuant to the policies established by the Board of Directors of the Company, on a basis consistently applied for each different variety of contracts. The liquidating values of futures, forward or options contracts traded on exchanges or on other Regulated Market are based upon the last available settlement prices of these contracts on exchanges and Regulated Markets on which the particular futures, forward or options contracts are traded by the Company; provided that if a futures, forward or options contract could not be liquidated on the day with respect to which Net Assets are being determined the liquidating value of such contract is such value as the Board of Directors of the Company may deem fair and reasonable.

2.2.9 In case of short term instruments which have a maturity of less than 90 days, the value of the instrument based on the net acquisition cost, is gradually adjusted to the repurchase price thereof. In the event of material changes in market conditions, the valuation basis of the investment is adjusted to the new market yields.

2.2.10 The Company may more specifically enter into securities lending transactions provided that Sub-Funds may lend securities in their portfolios to a borrower. To guarantee this transaction, the Sub-Fund receives collateral. Securities on loan are delivered to a third party broker and these assets continue to be valued as part of the portfolio of the Sub-Fund. Upon termination of a loan, the Sub-Fund is required to return to the borrower the collateral received. Loans can be terminated by the parties at any time. Securities lending generates additional income for the Sub-Fund according to the contractual arrangements. This remuneration is accounted in the Statement of Operations and Changes in Net Assets.

2.3 Currency exchange

The value of the assets and liabilities denominated in a currency other than the Reference Currency of the relevant Sub-Fund or Class are translated at the prevailing exchange rates in Luxembourg at the time of the determination of the corresponding Net Asset Value.

Income and expenses in currencies other than the Reference Currency of the respective Sub-Fund are translated at the exchange rate prevailing at the transaction date. The resulting net realised gains and losses and net change in unrealised profits or losses on currencies are included in the Statement of Operations and Changes in Net Assets.

The cost of investments expressed in currencies other than the Sub-Fund's Reference Currency is translated into the Sub-Fund's Reference Currency at the exchange rate prevailing at the purchase date.

The total Net Asset Value of the Company is equal to the sum of the Net Assets of the various Sub-Funds translated into USD at the prevailing exchange rates in Luxembourg on the relevant valuation day.

2.4 Combined financial statements

The combined Statement of Net Assets and combined Statement of Operations and Changes in Net Assets represent the total of the Statements of Net Assets and Statements of Operations and Changes in Net Assets of the individual Sub-Funds, expressed in USD.

2.5 Net realised gain or loss on sale of investments

The net realised gain or loss on sales of investments is determined on the basis of the average cost of investments sold and are recorded in the Statements of Operations and Changes in Net Assets.

Notes to the financial statements (continued)

2.6 Forward foreign exchange contracts

Net unrealised profits and losses on forward foreign exchange contracts is valued on the basis of forward exchange rates prevailing at the relevant valuation date and are included in the Statement of Net Assets under the item "Unrealised appreciation/depreciation on forward foreign exchange contracts".

Net change in unrealised profits and losses and net realised gain/loss are recorded in the Statement of Operations and Changes in Net Assets.

2.7 Futures contracts

Futures contracts are valued at their liquidation value based on the closing price on the market on which these futures contracts are quoted.

Futures contracts are disclosed in the Statement of Net Assets under the item "Unrealised appreciation/depreciation on financial futures contracts".

Net change in unrealised profit/ loss and net realised gain/loss are recorded in the Statement of Operations and Changes in Net Assets.

2.8 Swaps

Swaps pegged to indexes or financial instruments shall be valued at their market value, based on the applicable index or financial instrument. The valuation of the swaps tied to such indexes or financial instruments shall be based upon the market value of said swaps, in accordance with the procedures laid down by the Board of Directors of the Company.

Swaps are disclosed in the Statement of Net Assets under the item "Swaps at market value".

For the Sub-Funds Lyxor Index Fund - Lyxor J.P. Morgan Multi-factor Europe Index UCITS ETF, the swap has a reset on daily basis on close. At each end of day, the daily performance of basket (European shares only) and the daily performance of index (European index) is calculated and a global amount of reset is paid or received by the Sub-Fund and adjustment is made at the same time to the basket to maintain assets:

- 100% in basket,
- 0% in Marked To Market of swap.

2.9 Income

Dividends are recorded net and credited to income on the date upon which the relevant securities are first listed as "ex-dividend".

Interest income is accrued on a daily basis.

2.10 Formation expenses

The fees and expenses in connection with the incorporation and registration of the Company were borne by the Management Company, except for the Sub-Fund Lyxor Index Fund - Lyxor Alpha Plus Fund.

The incorporation fees borne by new Sub-Funds are amortised over a maximum period of five years. In the case of liquidation of a Sub-Fund, the liquidation fees will be borne by this Sub-Fund in their entirety.

2.11 Other expenses

Other expenses comprise liquidation fees and other fees.

2.12 Other income

The "Other income" presented in the Statement of Operations and Changes in Net Assets mainly include the subscription fees.

2.13 Transaction costs

The transaction costs include broker fees and fees charged by the depositary for securities and derivatives transactions. The broker fees are excluded from the cost of securities and derivatives purchased and sold. All these fees are recorded under caption "Transaction costs" in Statement of Operations and Changes in Net Assets.

Notes to the financial statements (continued)

3 - Management fees

Following a Novation Agreement dated April 9, 2014, Lyxor International Asset Management S.A.S was appointed as Management Company. The Management Company was incorporated on June 6, 1998 for a period of ninety nine years (99). Its registered office is established in France and its capital is 1 059 696 Euros. The management fees are paid out of the assets of each Sub-Fund on a monthly basis in arrears to the Management Company. The management fees are calculated for each Class of Shares within each Sub-Fund on the quarterly average of the Net Asset Value of each Sub-Fund over such quarter.

The annual management fees rates applicable at October 31, 2018 are as follows:

4 - Performance Fees

Lyxor Index Fund - Lyxor Alpha Plus Fund shall pay to the Management Company out of the assets of the relevant Class (Class IE-D) a Performance Fee calculated in accordance with the principles of the high water mark mechanism and equal to 5% multiplied by the relevant Class Net New Profits.

The Performance Fee is calculated and accrued on every Valuation Day for each Class of the Sub-Fund and payable in EUR at the end of each Class Performance Period.

5 - Depositary, Administrative, Registrar Agent and other fees

The fees of the Depositary Agent, of the Administrative Agent, of the Registrar Agent, the Intermediaries, nominees, any Paying Agents and the other financial agents mandated by the Company, the Management Company, are determined through mutual agreement with the relevant entity at the rate and according to the market practices in Luxembourg.

6 - Taxation

A subscription tax (*Taxe d'abonnement*) equal to (i) 0.01% per annum for all Classes of Shares dedicated to institutional investors and (ii) 0.05% per annum for the Classes of Shares dedicated to other investors, is payable quarterly to Luxembourg authorities and calculated on the basis of the Net Assets of each Sub-Fund on the last day of the quarter.

The portion of the assets of any Sub-Fund invested in other Luxembourg UCI, already subject to this tax, is not subject to the aforesaid tax.

No tax or charge is payable in Luxembourg following the issue of Shares, except for a capital duty of 1 250 EUR payable by the Company on incorporation. Under Luxembourg law, no tax is payable in Luxembourg on capital gains made in respect of any Shares.

Some Company income (in the form of dividends, interest or profits from sources outside Luxembourg) may be subject to withholding tax, at a variable rate, which may not be recoverable.

There is no subscription tax (*Taxe d'abonnement*) payable for UCITS ETF Classes within the meaning of the article 175 (e) of the amended Law of December 17, 2010 on undertakings for collective investment.

Notes to the financial statements (continued)

Data on reuse of collateral

Non-cash collateral received by the Company may not be sold, re-invested or pledged.

Safekeeping of collateral granted by the collective investment undertaking as part of total return swaps

The depositary, Société Générale Bank & Trust, carries out, inter alia, the safe-keeping of the assets of the Company as well as the monitoring of the cash flows and the monitoring and oversight of certain tasks of the Company.

Société Générale Bank & Trust may delegate safe-keeping services to safe-keeping delegates under the conditions stipulated in the depositary and paying agent agreement entered into between Société Générale Bank & Trust and the Management Company for an unlimited period of time and in accordance with article 34bis of the 2010 Law and articles 13 to 17 of the Commission Delegated Regulated (EU) 2016/438 of 17 December 2015. A list of the safe-keeping delegates is available on <http://www.securities-services.societegenerale.com/en/who-are/key-figures/financial-reports/>. In that respect, Société Générale Bank & Trust has in place a policy for the prevention, detection and management of conflicts of interest resulting from the concentration of activities in Société Générale's group or from the delegation of safekeeping functions to other Société Générale entities or to an entity linked to the Management Company.

11 - Collateral

As at October 31, 2018, the collateral received which is composed of margin deposits for the purpose of transacting in futures contracts are as follows:

Other Personnel having an impact on the risk profile	5	689 600	1 192 935	1 882 535

No carried interest was paid during the accounting period.

2 - COMPENSATION POLICY AND PRACTICES

The compensation paid by Lyxor Asset Management S.A.S. consists of fixed compensation and may, if economic conditions permit, include a variable component in the form of a discretionary bonus. These bonuses are not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor Asset Management S.A.S. applies the Société Générale Group compensation policy. This Group policy takes into consideration the remuneration provisions of directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereafter the "AIFM Directive") and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereafter the "UCITS V Directive"), which apply to the investment fund management sector.

In this framework, Lyxor Asset Management S.A.S. notably implemented, for all of the employees receiving deferred variable compensation, an indexing mechanism for a part of this variable compensation composed of multiple investment funds representing the activity of the Lyxor group, such as to ensure that the interests of the employees align with those of investors.

The Lyxor Asset Management S.A.S. compensation policy has no impact on the risk profile of the AIF or UCITS, and aims at avoiding conflicts of interest related to the financial management of the vehicles.

The details of the compensation policy are available at the following website: <http://www.lyxor.com/fr/menu-corporate/nous-connaître/mentions-reglementaires/>

SFT Regulation (Unaudited Information)

1 - Securities lending

Following the Regulation 2015/2365 of the European Parliament and of the Council of 25 November 2015 on transparency of securities financing transactions, please find below details about securities lending transactions for the year ending October 31, 2018:

	Lyxor Index Fund - Lyxor Core Euro Stoxx 300 (DR)	Lyxor Index Fund - Lyxor MSCI EMU Growth (DR) UCITS ETF	Lyxor Index Fund - Lyxor MSCI EMU Value (DR) UCITS ETF	Lyxor Index Fund - Lyxor Smart Cash
Amount of securities lent expressed in absolute amount (in the currency of the sub-fund)	See Note 9	See Note 9	See Note 9	See Note 9
Proportion of lendable assets*	0.00%	1.15%	2.72%	7.14%
Proportion of AUM	0.00%	1.13%	2.72%	7.24%

Efficient Portfolio Management Techniques (Unaudited Information)

For the year ended October 31, 2018, as required by the CSSF circular 13/559, the securities lending income generated by the Fund is as follows:

Sub-Fund	Total gross amount of securities lending income (in the Sub-Fund currency)	Direct and indirect operational costs incurred (in EUR)	Total net amount of securities lending income (in the Sub-Fund currency)
Lyxor Index Fund - Lyxor Core Stoxx Europe 600 (DR)	82 874	29 006	53 868
Lyxor Index Fund - Lyxor Core Euro Stoxx 300 (DR)	23 328	8 165	15 163
Lyxor Index Fund - Lyxor Core Euro Stoxx 50 (DR)	8 503	2 976	5 527
Lyxor Index Fund - Lyxor MSCI EMU Growth (DR) UCITS ETF	72	25	47
Lyxor Index Fund - Lyxor MSCI EMU Value (DR) UCITS ETF	3 055	1 069	1 986

The following table mentions the net amount of securities lending income and the direct and indirect operational costs/fees arising from securities lending transactions and paid to the Management Company and the securities lending agent as applicable:

	Sub-Fund	Lyxor	Société Générale in its quality of securities lending agent
Lyxor Index Fund - Lyxor Core Stoxx Europe 600 (DR)	53 868	16 575	12 431
Lyxor Index Fund - Lyxor Core Euro Stoxx 300 (DR)	15 163	4 666	3 499
Lyxor Index Fund - Lyxor Core Euro Stoxx 50 (DR)	5 527	1 701	1 275
Lyxor Index Fund - Lyxor MSCI EMU Growth (DR) UCITS ETF	47	14	11
Lyxor Index Fund - Lyxor MSCI EMU Value (DR) UCITS ETF	1 986	611	458

The following table expresses the split in percentage:

	Sub-Fund	Lyxor	Société Générale in its quality of securities lending agent
All Sub-Funds	65%	20%	15%

The Management Company has appointed Société Générale to act as an intermediary of the securities lending transactions processed by the Funds. Direct and indirect operational costs/fees associated with these transactions are mentioned above. Société Générale is an entity related to the Management Company.

When Société Générale acts as securities lending agent and/or counterparty to securities lending transactions, a conflict of interests may arise between the Management Company and Société Générale. The Management Company has procedures in place to identify and reduce such conflict of interests and to resolve them equitably if necessary.

Counterparties of securities lending transactions are listed in Note 9 "Securities lending" above."

Regarding the Sub-Fund Lyxor Index Fund - Lyxor Smart Cash, the income from the securities lending activities incurred during the period ended October 31, 2018, is included in the valuation of the swap."

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information)

Lyxor International Asset Management REPORTING ON INTEGRATION OF ENVIRONMENTAL, SOCIAL, AND GOVERNANCE (ESG) CRITERIA as of October 2018 Lyxor Core STOXX Europe 600 (DR)

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

As part of the SRI Policy, Lyxor has implemented a Shareholder Engagement for this fund. Lyxor has published its voting policy as an independent document available on Lyxor website.

The scope for voting is the following: French Funds (Fonds Communs de Placement – FCP)*, French & Luxembourgish SICAV (*) limited to European issuers. To prevent excess cost resulting by the voting process, Lyxor votes only where its consolidated holdings represent at least 0.10% of the company's equity capital.

(*) Except the vehicles using a method of synthetic replication which are designed to track a financial exposure through a performance swap.

This fund applies an active ownership. This stake lets us influence companies to improve their ESG practices in the long term.

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

Active Ownership - Governance:

A governance committee oversees the implementation of Lyxor's Voting Policy. It is empowered to establish voting guidelines and is responsible to ensure that these guidelines and procedures are followed. Lyxor revises its voting policy on a yearly basis. An annual voting report will be published on the Website Lyxor.com

Active Ownership - Operational set up:

For an optimal voting preparation process and execution Lyxor uses a Proxy Voting Advisor.

Lyxor currently uses the services of ISS (Institutional Shareholder Services) for the implementation of its voting policy.

Where electronic voting is possible, voting is cast through a Proxy Exchange Platform. In exceptional cases where electronic voting is not possible (notably for some French companies) proxy voting forms are filled out and sent to the relevant issuers by post.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The results of our shareholder engagement are detailed in the Lyxor annual voting report published on the Website Lyxor.com.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Red Flag	6%
Orange Flag	31%
Yellow Flag	24%
Green Flag	39%

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales		
178	182	144	Portfolio rated by weight	98%
			Scope 1 reported (vs estimated)	97%
			Scope2 reported (vs estimated)	95%
			Scope 1& 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	11%
Thermal Coal	2%
Natural Gaz	9%
Oil	10%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on investment of : \$1,000,000	
Thermal Coal (Tons)	454
Gas (MMBOE)	0.0028
Oil (MMBOE)	0.0027

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M invested	
Metallurgical Coal	838.1
Thermal Coal	829.2
Oil	1 184.0
Gas	892.2
Total	3 745.4

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M Invested	
Thermal Coal	829.2
Oil Sands	105.1
Shale Oil or Shale Gas	4.6
Sum High Impact Reserves	939.0
Other	2 806.4

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio .

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	9.5%	6.9%	10.4%
Some efforts	82.5%	90.1%	73.2%
Limited efforts/Information	2.3%	1.6%	4.6%
No effort/No evidence	5.7%	1.4%	11.9%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:	
0-19.9%	20%
20-49.9%	5%
50-100%	1%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	17.2%
Energy Efficiency	18.8%
Green Building	2.7%
Pollution Prevention	4.8%
Sustainable Water	6.4%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution	
Alternative Energy	0.9%
Energy Efficiency	1.8%
Green Building	0.5%
Pollution Prevention	0.4%
Sustainable Water	0.3%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Lyxor International Asset Management RAPPORT SUR L'INTEGRATION DES CRITERES ENVIRONNEMENTAUX, SOCIAUX, ET DE GOUVERNANCE (ESG) en date de octobre 2018 Lyxor Core EURO STOXX 300 (DR)

Conformément aux articles L.533-22-1 et D.533-16-1 du Code Monétaire et Financier.

1. Description des critères Environnementaux, Sociaux et de Gouvernance (ESG) (référence II-2°)

Lyxor est signataire des Principes pour l'Investissement Responsable des Nations Unies (UN PRI) et a adopté une politique d'investissement responsable qui présente les valeurs et les pratiques établies par notre organisation afin d'intégrer les enjeux Environnementaux, Sociaux et de Gouvernance (« ESG ») dans nos solutions d'investissement. La politique ISR de Lyxor est disponible sur le site internet Lyxor.com. Elle est révisée chaque année.

Pour ce fonds la politique d'investissement responsable inclut les points suivants:

a) Description de la nature des critères ESG pris en compte (référence III-1°-a)

Partie intégrante de sa politique d'investisseur Responsable, Lyxor a implémenté un engagement actionnaire sur ce fonds. Lyxor a publié une politique de vote qui est disponible sur le site de Lyxor.com.

Cette année, le périmètre de vote est le suivant :

Fonds de droit français (Fonds communs de placement – FCP), SICAV de droit français et luxembourgeois(*) limités aux titres de capital d'émetteur domiciliés en Europe.

Afin de prévenir les coûts excessifs inhérents au processus de vote, Lyxor participe aux assemblées générales lorsque la détention consolidée représente plus de 0.10% du capital de la société.

(*) A l'exception des véhicules qui emploient une méthode de réplication indirecte dans le but de reproduire une exposition financière par le biais d'un swap de performance.

Ce fonds est inclus dans le scope de vote.

b) Informations utilisées pour l'analyse mise en œuvre sur les critères ESG (référence III-2°)

L'intégration des risques et des opportunités ESG dans la gestion classique (appelée aussi mainstream) et dans les décisions d'investissement doit se baser sur des sources de recherche appropriées.

Le processus d'intégration se concentre sur l'impact potentiel des enjeux ESG sur les entreprises (positif et négatif), ce qui peut affecter les décisions d'investissement.

Lyxor utilise différentes sources d'information externes, y compris les agences de notations extra-financières suivantes : MSCI-ESG Research, Vigeo-Eiris, ISS Ethix and Sustainalytics.

Lyxor utilise les services d'ISS-Ethix afin d'identifier les compagnies considérées en violation de sa politique Défense.

Lyxor utilise les services d'une agence en conseil de vote, ISS (Institutional Shareholder Services), pour la recherche sur la gouvernance des compagnies et les recommandations de vote. Ces recommandations de votes sont basées sur la politique de vote de Lyxor. Lyxor conserve la décision finale.

Chaque partenariat a été mis en place à la suite d'une sélection rigoureuse basée sur des appels d'offre et des procédures de diligence adressant les sujets spécifiques.

c) Méthodologie et mise en œuvre de cette analyse (référence III-3°a)

Politique de vote - Gouvernance:

Un comité de gouvernance supervise la mise en œuvre de la politique de vote. Il a la charge d'établir les lignes directrices de la politique de vote et a la responsabilité de s'assurer que ces directives et procédures sont suivies. Lyxor révisé sa politique de vote chaque année. Un rapport de vote annuel est publié sur le site internet Lyxor.com.

Politique de vote - Processus opérationnel :

Pour une préparation optimale du processus de vote, Lyxor utilise les services d'une agence en conseil de vote, ISS.

Lorsque le vote électronique est possible, le vote est effectué par le biais d'une plate-forme de vote par procuration. Dans les cas exceptionnels où le vote électronique est impossible (notamment pour certaines entreprises françaises), des formulaires de vote par procuration sont remplis et envoyés aux émetteurs par voie postale.

d) Présentation de l'intégration des résultats de l'analyse dans la politique d'investissement (référence II-2°-d)

Les résultats de notre engagement actionnaire sont détaillés dans le rapport de vote annuel de Lyxor publié sur le site internet de Lyxor.com.

2. Description de la manière dont sont intégrés les résultats de l'analyse mise en œuvre sur les critères ESG, notamment d'exposition aux risques climatiques, dans la politique d'investissement (Référence II-2°)

LYXOR étend graduellement une capacité de notation ESG et Carbone en utilisant une méthodologie propriétaire pour ses véhicules.

En complément de cette notation, au regard de la communication sur la prise en compte du risque climatique et la contribution d'un portefeuille à la transition énergétique et écologique ainsi que son alignement avec l'objectif international de limitation du réchauffement climatique à 2 degrés à horizon 2100, nous avons décidé de reporter les expositions suivantes calculées au niveau du portefeuille:

- Empreinte Carbone du Portefeuille
- Exposition du portefeuille au risque de transition (part brune)
- Exposition du portefeuille aux émetteurs proposant des solutions environnementales (part verte)

La mesure des émissions de GES de ses investissements donne aux investisseurs une indication de leurs émissions financées.

Services aux Collectivités	1.5%	1.9%	1.6%			0.1%			

Pour chaque émetteur (Compagnie et Gouvernement), la classification ESG des secteurs de l'industrie est fournie par MSCI ESG Ratings.

A noter, les émetteurs de type gouvernement sont classifiés comme appartenant au secteur « Finance »

Méthodologie de notation ESG (émetteurs entreprises & gouvernement)

La note ESG calculée au niveau du portefeuille mesure la capacité des émetteurs sous jacents à gérer les risques et opportunités clés liés aux facteurs environnementaux, sociaux et de gouvernance. L'échelle de notation est comprise entre 0 (fort risqué) et 10 (faible risque).

Les notations émetteurs sont calculées en absolu sur chaque pilier et sous thème et sont comparables quelque soit le secteur.

Pour les secteurs et les thèmes, le score du portefeuille est basé uniquement sur le sous-ensemble de titres qui ont des scores pertinents. Les poids des émetteurs du sous-ensemble sont ré pondérés à 100%

Les pondérations des trois critères, environnementaux, sociaux et de gouvernance, tiennent compte des problèmes spécifiques de chaque secteur.

Pour les compagnies, l'exposition aux mesures et la gestion des enjeux ESG couvrent les thèmes suivants:

- Environnement: Pollution, gestion des déchets, utilisation durable des ressources, changement climatique
- Social: emploi, relations sociales, santé et sécurité, formations, respect des conventions de l'OIT
- Gouvernance : conseil d'administration ou surveillance, audit et contrôle interne, rémunération dirigeants

Pour les gouvernements, l'exposition aux mesures et la gestion des enjeux ESG couvrent les thèmes suivants:

- Environnement: Externalités Environnementales, Ressources Naturelles
- Social: Capital Humain, Environnement Economique
- Gouvernance: Gouvernance Financière et Gouvernance Politique

Source : Les données ESG brutes des entreprises sont fournies par l'agence MSCI

Exposition du portefeuille aux controverses

Mesure l'exposition du portefeuille aux entreprises faisant l'objet de controverses liées au respect des normes internationales selon leur degré de sévérité :

- Rouge : Indique que la compagnie est impliquée dans une ou plusieurs controverses très sévères;
- Orange : Indique que la compagnie a été impliquée dans une ou plusieurs controverses récentes, sévères, structurelles et qui sont en cours;
- Jaune : Indique que la compagnie est impliquée dans des controverses de niveau sévère à modéré;
- Vert : Indique que la compagnie n'est impliquée dans aucune controverse majeure.

Rouge	3%
Orange	23%
Jaune	31%
Vert	43%

Risques Climatiques et Transition Energétique

Empreinte carbone du portefeuille en date de octobre 2018

Emissions de carbone (tonnes CO2e/\$M investis)	Intensité Carbone (en tCO2 /\$M revenu)	Moyenne pondérée de l'intensité carbone (en tCO2 /\$M revenu)		
233	203	161	Portefeuille couvert (poids)	97%
			Scope 1 reporté (vs estimé)	98%
			Scope 2 reporté (vs estimé)	94%

Les estimations des données de scope 1 & 2 sont basées sur la méthodologie MSCI

Méthodologie de notation Carbone

Définition : L'empreinte carbone vise à tenir compte des émissions de gaz à effet de serre produites par les entreprises détenues en portefeuille. Les émissions carbone sont calculées à partir du volume estimé d'émissions directes (scope 1) et indirectes (scope 2) de Gaz à Effet de Serre (GES) des émetteurs sous jacents du portefeuille. Ces données ne prennent pas en compte l'ensemble des émissions induites par l'entreprise (scope 3) notamment celles liées à l'usage des produits ou en amont par les fournisseurs.

Carbon Emissions tons CO2e / \$M investis : Elle mesure le volume d'émissions de Gaz à Effet de Serre (GES) dont le portefeuille est responsable en proportion de sa part de capital.

Intensité Carbone Intensity tons CO2e / \$M sales : Les émissions carbone sont calculées à partir du volume estimé d'émissions directes (scope 1) et indirectes (scope 2) de gaz à effet de serre d'une entreprise rapporté à son chiffre d'affaires total. L'intensité carbone est mesurée en divisant le volume d'émissions de gaz à effet de serre en tCO2 équivalent par le chiffre d'affaires en millions d'euros.

La moyenne pondérée de l'intensité carbone (en tCO2 / \$M revenu) mesure l'exposition du portefeuille aux émetteurs intenses en carbone sur les scopes 1 et 2.

Scope : Les émissions carbone s'entendent Scope 1 + Scope 2

Emissions Scope 1 : émissions directes de Gaz à Effet de Serre (combustibles, fluides frigorigènes, carburants des véhicules possédés)

Emissions Scope 2 : émissions indirectes (électricité, achat de vapeur)

Source : Les données carbone brutes des entreprises sont fournies par l'agence MSCI

A noter: les mesures carbone sont applicables aux portefeuilles actions, en revanche seule la moyenne pondérée de l'intensité carbone (en tCO2 / \$M revenu) (#3) peut être utilisée pour les portefeuilles comprenant des émetteurs obligataires.

Exposition du portefeuille au risque de transition

Les données représentent l'exposition du portefeuille aux émetteurs détenant des réserves en énergies fossiles (en poids du portefeuille), susceptibles d'être dépréciées ou échoués (« stranded ») dans le contexte d'une transition bas carbone. Les réserves en charbon thermiques sont les plus intenses en carbone et de ce fait les plus à risques.

La part brune se définit comme le pourcentage de MWh générées à partir d'énergies fossiles ou la part de chiffre d'affaire de l'entreprise réalisée grâce aux énergies fossiles ou la part du portefeuille investie dans l'extraction de combustibles fossiles (pour refléter les produits et services exposés aux énergies fossiles).

Poid du portefeuille :	
Toutes réserves	10%
Charbon thermique	0%
Gaz Naturel	9%
Pétrole	9%

Actifs échoués: Réserves de combustibles fossiles

Le tableau présente les réserves dont un investisseur serait responsable en fonction des placements en dollars dans le portefeuille.

MMBOE signifie Million Barrils of Oil Equivalents

Basé sur un investissement de: 1 000 000 \$	
Charbon thermique (Tons)	0
Gaz (MMBOE)	0.0027
Pétrole (MMBOE)	0.0021

Actifs échoués: Émissions potentielles des réserves de combustibles fossiles

Différents carburants ont une teneur en carbone différente et une valeur calorifique nette différente. Afin de rendre les réserves de ces carburants comparables en termes de contribution aux émissions de gaz à effet de serre, nous calculons les émissions potentielles des carburants et les exprimons en tonnes de CO2 en utilisant la méthodologie de l'Institut de Potsdam.

Dans la mesure où les émissions potentielles totales des réserves connues de combustibles fossiles dépassent largement la limite des émissions qui, selon un consensus scientifique, doivent être respectées pour gérer les changements climatiques, nombre de ces réserves pourraient ne pas être utilisables. Si tel est le cas, les valeurs de marché des sociétés qui détiennent des réserves peuvent être surévaluées parce qu'elles reposent en partie sur la valeur actuelle de ces réserves, à supposer qu'elles puissent être pleinement utilisées.

ICO2e/\$M investis	
Charbon métallurgique	97.1
Charbon thermique	0.0
Pétrole	939.5
Gaz	863.2
Total	1 899.8

Actifs échoués: Réserves de combustibles fossiles à fort impact

Certains combustibles tels que le charbon, les sables bitumineux, l'huile et le gaz de schiste sont sans doute plus exposés au risque des biens échoués (stranded assets) car ils ont une teneur en carbone plus élevée que les autres types de pétrole et de gaz. Le charbon est de loin le type de combustible le plus carboné, émettant à peu près deux fois plus d'émissions de carbone par kilowatt-heure (kWh) que le gaz naturel. En plus d'une intensité carbone plus élevée, l'extraction de sources non conventionnelles de pétrole et de gaz peut être coûteuse en raison de divers défis géologiques, techniques et environnementaux - c'est le cas des sables bitumineux qui ont été ciblés comme étant particulièrement hostiles au climat.

En ce qui concerne le charbon, le débat sur les actifs en carbone s'est concentré sur le charbon thermique, qui est principalement utilisé dans la production d'électricité. Tandis que le charbon thermique et métallurgique ont une teneur élevée en carbone, le charbon métallurgique ou à coke est principalement utilisé dans la sidérurgie et a peu de substituts, de sorte que beaucoup d'investisseurs pensent que le charbon thermique est particulièrement vulnérable au risque de transition, il y aura toujours un avenir pour le charbon métallurgique.

ICO2e/\$M Investis	
Charbon thermique	0.0
Sable bitumineux	128.6
Huile de schiste ou gaz de schiste	0.0
Somme des réserves de combustibles fossiles à fort impact	128.6
Autre	1 771.2

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Gestion des risques liés au carbone: initiatives énergétiques

Les entreprises ont diverses stratégies afin de réduire les émissions, notamment en fixant des objectifs de réduction, en utilisant des sources d'énergie plus propres et en gérant leur consommation d'énergie. Bien que ces efforts varient considérablement d'une entreprise à l'autre, nous les classifions comme aucun effort, certains efforts, efforts limités et efforts agressifs afin de les rendre comparables. Cette information est présentée au niveau du portefeuille.

	Utilisation de sources d'énergie plus propres	Gestion de la consommation d'énergie et Efficacité opérationnelle	Objectifs de réduction du carbone
Efforts agressifs	9.4%	7.8%	13.5%
Certains efforts	84.5%	89.4%	71.1%
Efforts limités/Informations	1.9%	1.2%	4.1%
Aucun effort/Aucune preuve	4.2%	1.6%	11.3%

Exposition du portefeuille aux émetteurs proposant des solutions environnementales

Les données représentent l'exposition du portefeuille aux émetteurs proposant des solutions environnementales (en poids du portefeuille) et le type de solutions proposées : efficacité énergétique, énergie alternative, eau durable, prévention des pollutions ou construction durable. Ces émetteurs sont susceptibles de bénéficier d'une transition bas carbone.

La part verte se définit comme le pourcentage de l'encours investi dans des sociétés dont l'activité contribue à la lutte contre le changement climatique (pour refléter les éco-solutions/produits verts).

Emetteurs ayant un chiffre d'affaires consacré aux solutions environnementales compris entre :	
0-19.9%	27%
20-49.9%	8%
50-100%	2%

Poids des entreprises offrant des solutions technologiques propres

Énergie alternative	20.8%
Efficacité énergétique	28.1%
Bâtiment vert	2.9%
Prévention de la pollution	7.8%
Eau durable	7.8%

Exposition aux revenus consacrés aux solutions environnementales qui contribuent aux ODD

L'exposition du portefeuille aux revenus consacrés aux solutions environnementales reflète la part des revenus de l'entreprise exposés à des produits et services qui aident à résoudre les défis environnementaux majeurs du monde. Elle est calculée comme le produit du poids de l'émetteur dans le portefeuille ou l'indice et celui du pourcentage de revenus de chaque émetteur généré dans des solutions environnementales et durables.

Contribution aux Solutions Environnementales	
Énergie alternative	1.2%
Efficacité énergétique	3.0%
Bâtiment vert	0.7%
Prévention de la pollution	0.5%
Eau durable	0.3%

Lyxor International Asset Management (LIAM) est une société de gestion française agréée par l'Autorité des marchés financiers et conforme aux dispositions des Directives OPCVM (2009/65/CE) et AIFM (2011/61/EU). Société Générale est un établissement de crédit (banque) français agréé par l'Autorité de contrôle prudentiel et de résolution.

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Lyxor International Asset Management REPORTING ON INTEGRATION OF ENVIRONMENTAL, SOCIAL, AND GOVERNANCE (ESG) CRITERIA as of October 2018 Lyxor Core EURO STOXX 50 (DR)

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

As part of the SRI Policy, Lyxor has implemented a Shareholder Engagement for this fund. Lyxor has published its voting policy as an independent document available on Lyxor website.

The scope for voting is the following: French Funds (Fonds Communs de Placement – FCP)*, French & Luxembourgish SICAV (*) limited to European issuers. To prevent excess cost resulting by the voting process, Lyxor votes only where its consolidated holdings represent at least 0.10% of the company's equity capital.

(*) Except the vehicles using a method of synthetic replication which are designed to track a financial exposure through a performance swap.

This fund applies an active ownership. This stake lets us influence companies to improve their ESG practices in the long term.

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

Active Ownership - Governance:

A governance committee oversees the implementation of Lyxor's Voting Policy. It is empowered to establish voting guidelines and is responsible to ensure that these guidelines and procedures are followed. Lyxor revises its voting policy on a yearly basis. An annual voting report will be published on the Website Lyxor.com

Active Ownership - Operational set up:

For an optimal voting preparation process and execution Lyxor uses a Proxy Voting Advisor.

Lyxor currently uses the services of ISS (Institutional Shareholder Services) for the implementation of its voting policy.

Where electronic voting is possible, voting is cast through a Proxy Exchange Platform. In exceptional cases where electronic voting is not possible (notably for some French companies) proxy voting forms are filled out and sent to the relevant issuers by post.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The results of our shareholder engagement are detailed in the Lyxor annual voting report published on the Website Lyxor.com.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Red Flag	4%
Orange Flag	36%
Yellow Flag	37%
Green Flag	23%

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales		
145	143	129	Portfolio rated by weight	97%
			Scope 1 reported (vs estimated)	99%
			Scope2 reported (vs estimated)	99%
			Scope 1& 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	13%
Thermal Coal	0%
Natural Gaz	13%
Oil	13%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on investment of : \$1,000,000	
Thermal Coal (Tons)	0
Gas (MMBOE)	0.0037
Oil (MMBOE)	0.0033

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M invested	
Metallurgical Coal	0.0
Thermal Coal	0.0
Oil	1 465.1
Gas	1 207.8
Total	2 672.9

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M Invested	
Thermal Coal	0.0
Oil Sands	223.1
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	223.1
Other	2 449.8

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio .

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	10.4%	11.1%	18.4%
Some efforts	89.6%	88.9%	79.0%
Limited efforts/Information	0.0%	0.0%	2.6%
No effort/No evidence	0.0%	0.0%	0.0%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:	
0-19.9%	28%
20-49.9%	10%
50-100%	0%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	22.7%
Energy Efficiency	28.2%
Green Building	3.0%
Pollution Prevention	4.8%
Sustainable Water	7.7%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution	
Alternative Energy	1.2%
Energy Efficiency	3.0%
Green Building	0.4%
Pollution Prevention	0.1%
Sustainable Water	0.2%

Lyxor International Asset Management REPORTING ON INTEGRATION OF ENVIRONMENTAL, SOCIAL, AND GOVERNANCE (ESG) CRITERIA as of October 2018 Lyxor USD Liquid Investment Grade Corporate Bonds UCITS ETF

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings. To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Red Flag **7%**
Orange Flag **43%**
Yellow Flag **37%**
Green Flag **13%**

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales		
47	115	179	Portfolio rated by weight	62%
			Scope 1 reported (vs estimated)	87%
			Scope2 reported (vs estimated)	83%

Scope 1 & 2 estimations are based on MSCI methodology

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	10%
Thermal Coal	3%
Natural Gaz	6%
Oil	6%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

	Based on investment of : \$1,000,000
Thermal Coal (Tons)	0
Gas (MMBOE)	0.0007
Oil (MMBOE)	0.0010

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M invested	
Metallurgical Coal	0.0
Thermal Coal	0.8
Oil	432.2
Gas	218.5
Total	654.2

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M Invested	
Thermal Coal	0.8
Oil Sands	45.6
Shale Oil or Shale Gas	13.0
Sum High Impact Reserves	59.4
Other	594.7

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio .

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	2.3%	3.2%	0.8%
Some efforts	84.3%	90.2%	74.6%
Limited efforts/Information	1.5%	1.8%	2.2%
No effort/No evidence	8.7%	1.7%	17.6%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:	
0-19.9%	19%
20-49.9%	3%
50-100%	0%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	6.9%
Energy Efficiency	23.0%
Green Building	1.4%
Pollution Prevention	2.3%
Sustainable Water	1.5%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution	
Alternative Energy	0.2%
Energy Efficiency	2.0%
Green Building	0.0%
Pollution Prevention	0.0%
Sustainable Water	0.0%

Lyxor International Asset Management REPORTING ON INTEGRATION OF ENVIRONMENTAL, SOCIAL, AND GOVERNANCE (ESG) CRITERIA as of October 2018 Lyxor BofAML \$ High Yield Bond UCITS ETF

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings. To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	72%
9	23	29	Scope 1 reported (vs estimated)	39%
			Scope2 reported (vs estimated)	87%

Scope 1& 2 estimations are based on MSCI methodology

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	1%
Thermal Coal	0%
Natural Gaz	1%
Oil	1%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on investment of : \$1,000,000	
Thermal Coal (Tons)	0
Gas (MMBOE)	0.0011
Oil (MMBOE)	0.0001

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M invested	
Metallurgical Coal	0.0
Thermal Coal	0.0
Oil	38.4
Gas	0.0
Total	399.2

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M Invested	
Thermal Coal	0.0
Oil Sands	0.0
Shale Oil or Shale Gas	399.2
Sum High Impact Reserves	399.2
Other	0.0

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio .

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	1.2%	0.0%	1.2%
Some efforts	94.2%	99.6%	92.1%
Limited efforts/Information	0.5%	0.0%	0.0%
No effort/No evidence	4.1%	0.4%	4.9%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:	
0-19.9%	6%
20-49.9%	1%
50-100%	0%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	1.2%
Energy Efficiency	7.0%
Green Building	0.6%
Pollution Prevention	0.4%
Sustainable Water	0.0%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution	
Alternative Energy	0.0%
Energy Efficiency	0.5%
Green Building	0.0%
Pollution Prevention	0.0%
Sustainable Water	0.0%

Industrials			100.0%						0%	100%	0%

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales		
0	0	243	Portfolio rated by weight	100%
			Scope 1 reported (vs estimated)	0%
			Scope2 reported (vs estimated)	0%

Scope 1& 2 estimations are based on MSCI methodology

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	0%
Thermal Coal	0%
Natural Gaz	0%
Oil	0%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on investment of : \$1,000,000	
Thermal Coal (Tons)	0
Gas (MMBOE)	0.0000
Oil (MMBOE)	0.0000

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M invested	
Metallurgical Coal	0.0
Thermal Coal	0.0
Oil	0.0
Gas	0.0
Total	0.0

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M Invested	
Thermal Coal	0.0
Oil Sands	0.0
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	0.0

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio .

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	0.0%	0.0%	0.0%
Some efforts	0.0%	0.0%	0.0%
Limited efforts/Information	0.0%	0.0%	0.0%
No effort/No evidence	0.0%	0.0%	0.0%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:	
0-19.9%	0%
20-49.9%	0%
50-100%	0%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	0.0%
Energy Efficiency	0.0%
Green Building	0.0%
Pollution Prevention	0.0%
Sustainable Water	0.0%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution	
Alternative Energy	0.0%
Energy Efficiency	0.0%
Green Building	0.0%
Pollution Prevention	0.0%
Sustainable Water	0.0%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Lyxor International Asset Management REPORTING ON INTEGRATION OF ENVIRONMENTAL, SOCIAL, AND GOVERNANCE (ESG) CRITERIA as of October 2018 Lyxor MSCI EMU Growth (DR) UCITS ETF

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

As part of the SRI Policy, Lyxor has implemented a Shareholder Engagement for this fund. Lyxor has published its voting policy as an independent document available on Lyxor website.

The scope for voting is the following: French Funds (Fonds Communs de Placement – FCP)*, French & Luxembourgish SICAV (*) limited to European issuers. To prevent excess cost resulting by the voting process, Lyxor votes only where its consolidated holdings represent at least 0.10% of the company's equity capital.

(*) Except the vehicles using a method of synthetic replication which are designed to track a financial exposure through a performance swap.

This fund applies an active ownership. This stake lets us influence companies to improve their ESG practices in the long term.

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

Active Ownership - Governance:

A governance committee oversees the implementation of Lyxor's Voting Policy. It is empowered to establish voting guidelines and is responsible to ensure that these guidelines and procedures are followed. Lyxor revises its voting policy on a yearly basis. An annual voting report will be published on the Website Lyxor.com

Active Ownership - Operational set up:

For an optimal voting preparation process and execution Lyxor uses a Proxy Voting Advisor.

Lyxor currently uses the services of ISS (Institutional Shareholder Services) for the implementation of its voting policy.

Where electronic voting is possible, voting is cast through a Proxy Exchange Platform. In exceptional cases where electronic voting is not possible (notably for some French companies) proxy voting forms are filled out and sent to the relevant issuers by post.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The results of our shareholder engagement are detailed in the Lyxor annual voting report published on the Website Lyxor.com.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

Active Ownership - Governance:

A governance committee oversees the implementation of Lyxor's Voting Policy. It is empowered to establish voting guidelines and is responsible to ensure that these guidelines and procedures are followed. Lyxor revises its voting policy on a yearly basis. An annual voting report will be published on the Website Lyxor.com

Active Ownership - Operational set up:

For an optimal voting preparation process and execution Lyxor uses a Proxy Voting Advisor.

Lyxor currently uses the services of ISS (Institutional Shareholder Services) for the implementation of its voting policy.

Where electronic voting is possible, voting is cast through a Proxy Exchange Platform. In exceptional cases where electronic voting is not possible (notably for some French companies) proxy voting forms are filled out and sent to the relevant issuers by post.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

The results of our shareholder engagement are detailed in the Lyxor annual voting report published on the Website Lyxor.com.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales		
202	193	171	Portfolio rated by weight	98%
			Scope 1 reported (vs estimated)	78%
			Scope2 reported (vs estimated)	62%

Scope 1& 2 estimations are based on MSCI methodology

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	0%
Thermal Coal	0%
Natural Gaz	0%
Oil	0%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

	Based on investment of : \$1,000,000
Thermal Coal (Tons)	0
Gas (MMBOE)	0.0000
Oil (MMBOE)	0.0001

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M invested	
Metallurgical Coal	0.0
Thermal Coal	0.0
Oil	27.6
Gas	3.8
Total	31.4

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M Invested	
Thermal Coal	0.0
Oil Sands	0.0
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	0.0
Other	31.4

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio .

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	2.5%	0.3%	2.6%
Some efforts	55.6%	74.8%	25.7%
Limited efforts/Information	6.6%	10.5%	2.3%
No effort/No evidence	35.0%	14.2%	69.2%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:	
0-19.9%	20%
20-49.9%	4%
50-100%	4%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	11.9%
Energy Efficiency	16.8%
Green Building	5.0%
Pollution Prevention	6.3%
Sustainable Water	7.0%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution	
Alternative Energy	1.2%
Energy Efficiency	2.7%
Green Building	1.1%
Pollution Prevention	0.5%
Sustainable Water	0.4%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Lyxor International Asset Management REPORTING ON INTEGRATION OF ENVIRONMENTAL, SOCIAL, AND GOVERNANCE (ESG) CRITERIA as of October 2018 Lyxor MSCI EMU Value (DR) UCITS ETF

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

As part of the SRI Policy, Lyxor has implemented a Shareholder Engagement for this fund. Lyxor has published its voting policy as an independent document available on Lyxor website.

The scope for voting is the following: French Funds (Fonds Communs de Placement – FCP)*, French & Luxembourgish SICAV (*) limited to European issuers. To prevent excess cost resulting by the voting process, Lyxor votes only where its consolidated holdings represent at least 0.10% of the company's equity capital.

(*) Except the vehicles using a method of synthetic replication which are designed to track a financial exposure through a performance swap.

This fund applies an active ownership. This stake lets us influence companies to improve their ESG practices in the long term.

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

Active Ownership - Governance:

A governance committee oversees the implementation of Lyxor's Voting Policy. It is empowered to establish voting guidelines and is responsible to ensure that these guidelines and procedures are followed. Lyxor revises its voting policy on a yearly basis. An annual voting report will be published on the Website Lyxor.com

Active Ownership - Operational set up:

For an optimal voting preparation process and execution Lyxor uses a Proxy Voting Advisor.

Lyxor currently uses the services of ISS (Institutional Shareholder Services) for the implementation of its voting policy.

Where electronic voting is possible, voting is cast through a Proxy Exchange Platform. In exceptional cases where electronic voting is not possible (notably for some French companies) proxy voting forms are filled out and sent to the relevant issuers by post.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The results of our shareholder engagement are detailed in the Lyxor annual voting report published on the Website Lyxor.com.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Lyxor International Asset Management REPORTING ON INTEGRATION OF ENVIRONMENTAL, SOCIAL, AND GOVERNANCE (ESG) CRITERIA as of October 2018 Lyxor BofAML \$ Short Term High Yield Bond UCITS ETF

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	42%
136	182	270	Scope 1 reported (vs estimated)	58%
			Scope2 reported (vs estimated)	42%

Scope 1 & 2 estimations are based on MSCI methodology

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	12%
Thermal Coal	0%
Natural Gaz	12%
Oil	12%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on investment of : \$1,000,000	
Thermal Coal (Tons)	0
Gas (MMBOE)	0.0065
Oil (MMBOE)	0.0049

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M invested	
Metallurgical Coal	0.0
Thermal Coal	0.0
Oil	2 086.1
Gas	25.7
Total	4 190.8

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M Invested	
Thermal Coal	0.0
Oil Sands	17.4
Shale Oil or Shale Gas	3 789.9
Sum High Impact Reserves	3 807.3
Other	383.5

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio .

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	1.5%	4.4%	1.7%
Some efforts	47.9%	62.3%	29.7%
Limited efforts/Information	3.3%	1.0%	3.2%
No effort/No evidence	47.3%	32.3%	63.6%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:	
0-19.9%	12%
20-49.9%	2%
50-100%	0%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	1.8%
Energy Efficiency	9.0%
Green Building	2.3%
Pollution Prevention	3.4%
Sustainable Water	1.5%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution	
Alternative Energy	0.0%
Energy Efficiency	0.9%
Green Building	0.0%
Pollution Prevention	0.4%
Sustainable Water	0.1%

Sustainable Water	6.2%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution	
Alternative Energy	2.2%
Energy Efficiency	2.1%
Green Building	0.0%
Pollution Prevention	0.2%
Sustainable Water	1.0%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Lyxor International Asset Management REPORTING ON INTEGRATION OF ENVIRONMENTAL, SOCIAL, AND GOVERNANCE (ESG) CRITERIA as of October 2018 Lyxor SG Japan Quality Income UCITS ETF

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales		
265	252	161	Portfolio rated by weight	98%
			Scope 1 reported (vs estimated)	95%
			Scope2 reported (vs estimated)	82%

Scope 1 & 2 estimations are based on MSCI methodology

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	10%
Thermal Coal	4%
Natural Gaz	8%
Oil	8%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on investment of : \$1,000,000	
Thermal Coal (Tons)	286
Gas (MMBOE)	0.0002
Oil (MMBOE)	0.0001

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M invested	
Metallurgical Coal	337.8
Thermal Coal	522.0
Oil	41.3
Gas	31.8
Total	972.6

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M Invested	
Thermal Coal	522.0
Oil Sands	0.0
Shale Oil or Shale Gas	51.0
Sum High Impact Reserves	573.1
Other	399.6

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio .

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	1.6%	0.0%	7.4%
Some efforts	77.7%	91.9%	65.7%
Limited efforts/Information	5.1%	8.1%	2.1%
No effort/No evidence	15.6%	0.0%	24.8%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:	
0-19.9%	41%
20-49.9%	8%
50-100%	0%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	16.0%
Energy Efficiency	40.4%
Green Building	1.9%
Pollution Prevention	16.4%
Sustainable Water	20.1%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution	
Alternative Energy	0.3%
Energy Efficiency	4.0%
Green Building	0.0%
Pollution Prevention	0.9%
Sustainable Water	0.6%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Lyxor International Asset Management REPORTING ON INTEGRATION OF ENVIRONMENTAL, SOCIAL, AND GOVERNANCE (ESG) CRITERIA as of October 2018 Lyxor Global Gender Equality (DR) UCITS ETF

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

As part of the SRI Policy, Lyxor has implemented a Shareholder Engagement for this fund. Lyxor has published its voting policy as an independent document available on Lyxor website.

The scope for voting is the following: French Funds (Fonds Communs de Placement – FCP)*, French & Luxembourgish SICAV (*) limited to European issuers. To prevent excess cost resulting by the voting process, Lyxor votes only where its consolidated holdings represent at least 0.10% of the company's equity capital.

(*) Except the vehicles using a method of synthetic replication which are designed to track a financial exposure through a performance swap.

This fund applies an active ownership. This stake lets us influence companies to improve their ESG practices in the long term.

Sustainability themed investments inherently contribute to addressing social and/or environmental challenges such as climate change, eco-efficiency and health.

For equities funds: the companies are eligible if their share of sales from the sector of activity is above a certain threshold, or if they are in a dominant position on the market in question.

For ETF funds which aim to track the benchmark index, the description of the ESG approach above applies to the Benchmark Index.

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

Active Ownership - Governance:

A governance committee oversees the implementation of Lyxor's Voting Policy. It is empowered to establish voting guidelines and is responsible to ensure that these guidelines and procedures are followed. Lyxor revises its voting policy on a yearly basis. An annual voting report will be published on the Website Lyxor.com

Active Ownership - Operational set up:

For an optimal voting preparation process and execution Lyxor uses a Proxy Voting Advisor.

Lyxor currently uses the services of ISS (Institutional Shareholder Services) for the implementation of its voting policy.

Where electronic voting is possible, voting is cast through a Proxy Exchange Platform. In exceptional cases where electronic voting is not possible (notably for some French companies) proxy voting forms are filled out and sent to the relevant issuers by post.

For ETF funds with a Sustainable Themed Investment approach :

The Lyxor ETF aims to track its benchmark Index.

The index is designed by an index provider and potentially with an advisor for ESG input data. (such as Robeco SAM, Equileap, CBI, ...)

Details of the index methodology may be found on index provider website.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The results of our shareholder engagement are detailed in the Lyxor annual voting report published on the Website Lyxor.com.

The Lyxor Green Bonds (DR) UCITS ETF is invested in Green bonds which are fixed income securities whose proceeds are solely dedicated to the financing of eligible green projects focused on climate mitigation or adaptation efforts.

The Lyxor world water UCITS ETF aims to reproduce the performance of the index which consists of the 20 largest companies in the fields of water utilities, water infrastructure and water treatment.

The Lyxor new energy UCITS ETF aims to track the benchmark index which reflects the 20 largest stocks operating in the world alternative energy sector in the fields of solar, wind and biomass, the better use of energy generation such as energy meters and supra-conductors, power generation in close proximity to the consumer involving micro-turbines and fuel cells.

The LYXOR ETF Gender aims to track the evolution of an index which lists the most advanced companies in terms of gender equality in management and production functions as well as in terms of remuneration, work-life balance, internal policies, transparency and accountability, among others.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	98%
118	148	154	Scope 1 reported (vs estimated)	96%
			Scope2 reported (vs estimated)	98%

Scope 1 & 2 estimations are based on MSCI methodology

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	5%
Thermal Coal	0%
Natural Gaz	5%
Oil	5%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on investment of : \$1,000,000	
Thermal Coal (Tons)	0
Gas (MMBOE)	0.0033
Oil (MMBOE)	0.0010

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M invested	
Metallurgical Coal	0.0
Thermal Coal	0.0
Oil	420.8
Gas	250.9
Total	1 501.2

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M Invested	
Thermal Coal	0.0
Oil Sands	45.0
Shale Oil or Shale Gas	911.8
Sum High Impact Reserves	956.8
Other	544.5

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio .

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	6.2%	4.5%	6.1%
Some efforts	87.0%	93.5%	78.5%
Limited efforts/Information	2.8%	1.3%	3.4%
No effort/No evidence	4.1%	0.7%	12.0%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:	
0-19.9%	25%
20-49.9%	6%
50-100%	1%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	11.5%
Energy Efficiency	22.3%
Green Building	5.5%
Pollution Prevention	5.1%
Sustainable Water	5.4%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution	
Alternative Energy	0.5%
Energy Efficiency	2.0%
Green Building	0.7%
Pollution Prevention	0.5%
Sustainable Water	0.6%

Lyxor International Asset Management REPORTING ON INTEGRATION OF ENVIRONMENTAL, SOCIAL, AND GOVERNANCE (ESG) CRITERIA as of October 2018 Lyxor BofAML € High Yield Ex-Financial Bond UCITS ETF

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M invested	
Metallurgical Coal	0.0
Thermal Coal	0.0
Oil	5.8
Gas	3.9
Total	9.7

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio .

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	4.7%	7.6%	6.7%
Some efforts	72.3%	74.6%	52.4%
Limited efforts/Information	5.8%	7.3%	7.4%
No effort/No evidence	15.0%	8.4%	20.8%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:	
0-19.9%	27%
20-49.9%	6%
50-100%	2%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	14.2%
Energy Efficiency	30.3%
Green Building	1.1%
Pollution Prevention	6.7%
Sustainable Water	4.1%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution	
Alternative Energy	1.2%
Energy Efficiency	2.9%
Green Building	0.0%
Pollution Prevention	1.0%
Sustainable Water	0.4%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Lyxor International Asset Management REPORTING ON INTEGRATION OF ENVIRONMENTAL, SOCIAL, AND GOVERNANCE (ESG) CRITERIA as of October 2018 Lyxor EuroMTS 10Y Spain BONO Government Bond (DR) UCITS ETF

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance; Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance; Financial Governance, Political Governance

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales		
0	0	282	Portfolio rated by weight	100%
			Scope 1 reported (vs estimated)	0%
			Scope2 reported (vs estimated)	0%

Scope 1& 2 estimations are based on MSCI methodology

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M invested	
Metallurgical Coal	852.5
Thermal Coal	948.0
Oil	549.8
Gas	270.8
Total	2 621.0

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M Invested	
Thermal Coal	948.0
Oil Sands	0.0
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	948.0
Other	1 673.0

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio .

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	7.6%	4.0%	9.2%
Some efforts	79.2%	88.2%	59.0%
Limited efforts/Information	2.9%	4.0%	5.5%
No effort/No evidence	10.3%	3.8%	26.3%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:	
0-19.9%	20%
20-49.9%	5%
50-100%	2%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	15.3%
Energy Efficiency	18.4%
Green Building	2.6%
Pollution Prevention	5.9%
Sustainable Water	8.3%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution	
Alternative Energy	1.6%
Energy Efficiency	1.6%
Green Building	0.6%
Pollution Prevention	0.7%
Sustainable Water	0.7%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Lyxor International Asset Management REPORTING ON INTEGRATION OF ENVIRONMENTAL, SOCIAL, AND GOVERNANCE (ESG) CRITERIA as of October 2018 Lyxor J.P. Morgan Multi-Factor World Index UCITS ETF

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	100%
236	268	334	Scope 1 reported (vs estimated)	83%
			Scope2 reported (vs estimated)	76%

Scope 1& 2 estimations are based on MSCI methodology

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	6%
Thermal Coal	2%
Natural Gaz	4%
Oil	4%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on investment of : \$1,000,000	
Thermal Coal (Tons)	148
Gas (MMBOE)	0.0011
Oil (MMBOE)	0.0013

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	8%
Thermal Coal	5%
Natural Gaz	5%
Oil	6%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on investment of : \$1,000,000	
Thermal Coal (Tons)	346
Gas (MMBOE)	0.0009
Oil (MMBOE)	0.0011

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M invested	
Metallurgical Coal	1 848.9
Thermal Coal	632.0
Oil	510.7
Gas	293.6
Total	3 285.2

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M Invested	
Thermal Coal	632.0
Oil Sands	111.0
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	743.0
Other	2 542.2

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio .

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	1.7%	0.5%	4.9%
Some efforts	71.3%	87.1%	58.1%
Limited efforts/Information	6.7%	9.7%	4.2%
No effort/No evidence	20.4%	2.6%	32.8%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:	
0-19.9%	30%
20-49.9%	4%
50-100%	2%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	15.2%
Energy Efficiency	26.4%
Green Building	8.9%
Pollution Prevention	9.0%
Sustainable Water	10.5%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution	
Alternative Energy	0.3%
Energy Efficiency	1.6%
Green Building	1.8%
Pollution Prevention	0.2%
Sustainable Water	0.2%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Lyxor International Asset Management REPORTING ON INTEGRATION OF ENVIRONMENTAL, SOCIAL, AND GOVERNANCE (ESG) CRITERIA as of October 2018 Lyxor FTSE UK Quality Low Vol Dividend (DR) UCITS ETF

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

As part of the SRI Policy, Lyxor has implemented a Shareholder Engagement for this fund. Lyxor has published its voting policy as an independent document available on Lyxor website.

The scope for voting is the following: French Funds (Fonds Communs de Placement – FCP)*, French & Luxembourgish SICAV (*) limited to European issuers. To prevent excess cost resulting by the voting process, Lyxor votes only where its consolidated holdings represent at least 0.10% of the company's equity capital.

(*) Except the vehicles using a method of synthetic replication which are designed to track a financial exposure through a performance swap.

This fund applies an active ownership. This stake lets us influence companies to improve their ESG practices in the long term.

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

Active Ownership - Governance:

A governance committee oversees the implementation of Lyxor's Voting Policy. It is empowered to establish voting guidelines and is responsible to ensure that these guidelines and procedures are followed. Lyxor revises its voting policy on a yearly basis. An annual voting report will be published on the Website Lyxor.com

Active Ownership - Operational set up:

For an optimal voting preparation process and execution Lyxor uses a Proxy Voting Advisor.

Lyxor currently uses the services of ISS (Institutional Shareholder Services) for the implementation of its voting policy.

Where electronic voting is possible, voting is cast through a Proxy Exchange Platform. In exceptional cases where electronic voting is not possible (notably for some French companies) proxy voting forms are filled out and sent to the relevant issuers by post.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The results of our shareholder engagement are detailed in the Lyxor annual voting report published on the Website Lyxor.com.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales		
158	172	159	Portfolio rated by weight	99%
			Scope 1 reported (vs estimated)	93%
			Scope2 reported (vs estimated)	98%
			Scope 1& 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	20%
Thermal Coal	5%
Natural Gaz	15%
Oil	12%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

	Based on investment of : \$1,000,000
Thermal Coal (Tons)	164
Gas (MMBOE)	0.0041
Oil (MMBOE)	0.0046

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

Lyxor International Asset Management REPORTING ON INTEGRATION OF ENVIRONMENTAL, SOCIAL, AND GOVERNANCE (ESG) CRITERIA as of October 2018 Lyxor Smart Cash

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

Measuring the GHG emissions of its investments is seen as a first step. This will provide investors with an indication of their current financed emissions.

After carefully analyzing the Indicators and data available to take into account and measure the transition risks that climate change poses to Issuers, Lyxor will not report on those matters at this time. We will work with our external providers in order to enhance our knowledge to report and better reflect the risk of transition in the coming years.

- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

Measuring the GHG emissions of its investments is seen as a first step. This will provide investors with an indication of their current financed emissions.

After carefully analyzing the Indicators and data available to take into account and measure the transition risks that climate change poses to Issuers, Lyxor will not report on those matters at this time. We will work with our external providers in order to enhance our knowledge to report and better reflect the risk of transition in the coming years.

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Lyxor International Asset Management REPORTING ON INTEGRATION OF ENVIRONMENTAL, SOCIAL, AND GOVERNANCE (ESG) CRITERIA as of October 2018 Lyxor BTP Daily (-1x) Inverse UCITS ETF

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings. To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Red Flag 6%
Orange Flag 21%
Yellow Flag 31%
Green Flag 42%

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	69%
313	304	218	Scope 1 reported (vs estimated)	100%
			Scope2 reported (vs estimated)	100%

Scope 1& 2 estimations are based on MSCI methodology

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	15%
Thermal Coal	8%
Natural Gaz	6%
Oil	9%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on investment of : \$1,000,000	
Thermal Coal (Tons)	1 307
Gas (MMBOE)	0.0011
Oil (MMBOE)	0.0009

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M invested	
Metallurgical Coal	2 089.3
Thermal Coal	2 386.7
Oil	416.7
Gas	342.5
Total	5 235.2

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M Invested	
Thermal Coal	2 386.7
Oil Sands	68.1
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	2 454.8
Other	2 780.4

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio .

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	7.4%	9.8%	9.1%
Some efforts	85.9%	84.5%	75.3%
Limited efforts/Information	2.3%	1.3%	4.8%
No effort/No evidence	4.4%	4.4%	10.8%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:	
0-19.9%	29%
20-49.9%	4%
50-100%	0%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	14.9%
Energy Efficiency	28.4%
Green Building	0.0%
Pollution Prevention	6.9%
Sustainable Water	3.5%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution	
Alternative Energy	0.5%
Energy Efficiency	1.7%
Green Building	0.0%
Pollution Prevention	0.5%
Sustainable Water	0.4%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Lyxor International Asset Management REPORTING ON INTEGRATION OF ENVIRONMENTAL, SOCIAL, AND GOVERNANCE (ESG) CRITERIA as of October 2018 Lyxor FTSE USA Infrastructure UCITS ETF

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.
To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales		
644	2 126	1 760	Portfolio rated by weight	100%
			Scope 1 reported (vs estimated)	93%
			Scope2 reported (vs estimated)	65%

Scope 1& 2 estimations are based on MSCI methodology

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	17%
Thermal Coal	13%
Natural Gaz	4%
Oil	4%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on investment of : \$1,000,000	
Thermal Coal (Tons)	603
Gas (MMBOE)	0.0000
Oil (MMBOE)	0.0000

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M invested	
Metallurgical Coal	0.0
Thermal Coal	1 102.0
Oil	21.1
Gas	2.2
Total	1 125.4

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M Invested	
Thermal Coal	1 102.0
Oil Sands	0.0
Shale Oil or Shale Gas	21.1
Sum High Impact Reserves	1 123.1
Other	2.2

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio .

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	26.4%	0.0%	20.5%
Some efforts	51.5%	90.3%	28.7%
Limited efforts/Information	10.3%	1.1%	19.4%
No effort/No evidence	11.7%	8.6%	31.3%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:	
0-19.9%	35%
20-49.9%	10%
50-100%	0%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	46.4%
Energy Efficiency	18.2%
Green Building	0.0%
Pollution Prevention	0.4%
Sustainable Water	2.7%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution	
Alternative Energy	3.1%
Energy Efficiency	0.6%
Green Building	0.0%
Pollution Prevention	0.0%
Sustainable Water	0.3%

Sustainable Water	6.7%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution	
Alternative Energy	3.6%
Energy Efficiency	1.3%
Green Building	0.0%
Pollution Prevention	0.0%
Sustainable Water	1.6%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Lyxor International Asset Management REPORTING ON INTEGRATION OF ENVIRONMENTAL, SOCIAL, AND GOVERNANCE (ESG) CRITERIA as of October 2018 Lyxor Italia Bond PIR (DR) UCITS ETF

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

As part of the SRI Policy, Lyxor has implemented a Shareholder Engagement for this fund. Lyxor has published its voting policy as an independent document available on Lyxor website.

The scope for voting is the following: French Funds (Fonds Communs de Placement – FCP)*, French & Luxembourgish SICAV (*) limited to European issuers. To prevent excess cost resulting by the voting process, Lyxor votes only where its consolidated holdings represent at least 0.10% of the company's equity capital.

(*) Except the vehicles using a method of synthetic replication which are designed to track a financial exposure through a performance swap.

This fund applies an active ownership. This stake lets us influence companies to improve their ESG practices in the long term.

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

Active Ownership - Governance:

A governance committee oversees the implementation of Lyxor's Voting Policy. It is empowered to establish voting guidelines and is responsible to ensure that these guidelines and procedures are followed. Lyxor revises its voting policy on a yearly basis. An annual voting report will be published on the Website Lyxor.com

Active Ownership - Operational set up:

For an optimal voting preparation process and execution Lyxor uses a Proxy Voting Advisor.

Lyxor currently uses the services of ISS (Institutional Shareholder Services) for the implementation of its voting policy.

Where electronic voting is possible, voting is cast through a Proxy Exchange Platform. In exceptional cases where electronic voting is not possible (notably for some French companies) proxy voting forms are filled out and sent to the relevant issuers by post.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The results of our shareholder engagement are detailed in the Lyxor annual voting report published on the Website Lyxor.com.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

Measuring the GHG emissions of its investments is seen as a first step. This will provide investors with an indication of their current financed emissions.

After carefully analyzing the Indicators and data available to take into account and measure the transition risks that climate change poses to Issuers, Lyxor will not report on those matters at this time. We will work with our external providers in order to enhance our knowledge to report and better reflect the risk of transition in the coming years.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings. To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales		
19	52	40	Portfolio rated by weight	99%
			Scope 1 reported (vs estimated)	85%
			Scope2 reported (vs estimated)	60%

Scope 1& 2 estimations are based on MSCI methodology

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	0%
Thermal Coal	0%
Natural Gaz	0%
Oil	0%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

	Based on investment of : \$1,000,000
Thermal Coal (Tons)	0
Gas (MMBOE)	0.0000
Oil (MMBOE)	0.0000

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M invested	
Metallurgical Coal	0.0
Thermal Coal	0.0
Oil	0.0
Gas	0.0
Total	0.0

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M Invested	
Thermal Coal	0.0
Oil Sands	0.0
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	0.0
Other	0.0

Reporting on integration of Environmental, Social and Governance (ESG) Criteria (Unaudited Information) (continued)

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio .

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	0.8%	0.8%	0.6%
Some efforts	48.6%	63.3%	45.6%
Limited efforts/Information	1.9%	8.6%	0.0%
No effort/No evidence	48.1%	27.1%	52.9%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:	
0-19.9%	44%
20-49.9%	10%
50-100%	4%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	7.2%
Energy Efficiency	57.3%
Green Building	0.0%
Pollution Prevention	4.9%
Sustainable Water	3.1%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution	
Alternative Energy	0.2%
Energy Efficiency	9.4%
Green Building	0.0%
Pollution Prevention	0.2%
Sustainable Water	0.0%

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	0%
Thermal Coal	0%
Natural Gaz	0%
Oil	0%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on investment of : \$1,000,000	
Thermal Coal (Tons)	0
Gas (MMBOE)	0.0000
Oil (MMBOE)	0.0000

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M invested	
Metallurgical Coal	0.0
Thermal Coal	0.0
Oil	0.0
Gas	0.0
Total	0.0

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M Invested	
Thermal Coal	0.0
Oil Sands	0.0
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	0.0
Other	0.0

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio .

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	0.0%	0.0%	0.0%
Some efforts	0.0%	0.0%	0.0%
Limited efforts/Information	0.0%	0.0%	0.0%
No effort/No evidence	0.0%	0.0%	0.0%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:	
0-19.9%	0%
20-49.9%	0%
50-100%	0%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	0.0%
Energy Efficiency	0.0%
Green Building	0.0%
Pollution Prevention	0.0%
Sustainable Water	0.0%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution	
Alternative Energy	0.0%
Energy Efficiency	0.0%
Green Building	0.0%
Pollution Prevention	0.0%
Sustainable Water	0.0%
